Checklist of Oklahoma Birds

This bird list, compiled by Gary D. Schnell, includes species for which there are a number of Oklahoma records and is based primarily on the *Date Guide to the Occurrences of Birds in Oklahoma*, 4th edition (Oklahoma Bird Records Committee, 2004, Oklahoma Ornithological Society, Tulsa). It takes into account name changes through the 49th supplement to the *Check-list of North American Birds* (1998, American Ornithologists' Union, Washington, D.C.), but does not follow the change in sequence of families outlined in the 44th supplement. Species status codes for Oklahoma are included, with abbreviations as follows:

S=Summer; W=Winter;
P=Permanent; R=Resident;
V=Visitant; T=Transient.

Visitants are species that occur irregularly, and transients are those that pass through the state on spring and/or fall migration.
